

Staff Augmentation Professional Services | Talent on Demand

Giving complete control to organizations for effective implementation of their multi-sourcing projects by providing skilled security experts on time at the best cost.

Benefits for you

- 🔒 intiGrow renders support to customers for handling their organization's IT resource requests globally, and thus enabling them to bag the best in-class technical and functional resources.
- 🔒 intiGrow's staffing practices provides customers with a mature way of getting access to specialized skills, expertise and contract employees, and thereby reducing customer overhead of part-time recruitment.
- 🔒 With the simple resource management solution provided by intiGrow, customers can meet their project deadlines easily and conveniently.
- 🔒 intiGrow's Security Consultants are backed by appropriate certifications and quality management ethics that helps them formulate right strategy for successful implementation and delivery of projects for customers.

Our Staff Augmentation services provide skilled personnel to work under customer direction to help them develop, maintain, manage and support their security environment. Our professional services utilizes a proven services methodology that leverages best practices, compliance and security frameworks, and industry standards to provide customers with a comprehensive information security solution.

Why intiGrow?

- 🔒 **Scalability in Control:** With its highly competitive Resource Management Group (RMG), intiGrow ensures that the best resources are dedicated and made available on time; enabling customers quickly scale up as per their project plans.
- 🔒 **Efficiency in Control:** intiGrow ensures that the customers get the best in-class professionals who are skilled and experienced in the right technology with fine customer interactions, thereby enhancing customer productivity and efficiency.
- 🔒 **Incident Management/Escalation in Control:** intiGrow provides the right resource at the right time with the right expertise to resourcing requirements of all sizes, ensuring optimum resource utilization and management by the customer. The Resource Management Group at intiGrow undertakes the responsibility of resource optimization, cost control and escalation handling enabling smoother customer interaction and resource delivery.
- 🔒 **Attrition in Control:** intiGrow lives up to the commitment given to the customer of ensuring the resources serve the project duration and there are minimum or no attrition. intiGrow understands the criticality of resource management and provides complete control over resource attrition, and extends quick support in case of resource deficiency.
